B2 FIRST: PART 3 AND 4
(18)

Now, I'd like you to talk about something together for about two minutes.

I'd like you to imagine that you are talking about **environmental issues**. Here are some of the ideas they are thinking about and a question for you to discuss. First you have some time to look at the task.

How can we get more young people interested in environmental issues?

- outings to the countryside
- workshops
- media campaigns
- visits to museums
- talks in schools and universities

Now, talk to each other about **what would make more young people take an interest in the environment**.

Thank you. Now you have about a minute to decide **which is the most effective way to get young people to think about the environment**.

Discuss these questions

1. Some people think that you cannot look after the environment and have a good quality of life. What do you think?
2. How do most people try to avoid contaminating the planet?
3. Do you think most people care about our planet enough to try to save it?
