B2 FIRST: PART 3 AND 4
(18)

Now, I'd like you to talk about something together for about two minutes.

I'd like you to imagine that you are talking about **government funding and the environment**. Here are some of the ideas they are thinking about and a question for you to discuss. First you have some time to look at the task.

What should the government invest its limited funding in to prevent environmental problems?

- public transport
- renewable energy
- education
- zoos and wildlife parks
- recycling plants

Now, talk to each other about **what are the best ways the government could help the environment**.

.....

Thank you. Now you have about a minute to decide **which is the most effective way for the government to invest its money**.

Discuss these questions

1. Why does the government not protect the environment to the best of its ability?
2. Do you share the opinion that climate change will cause the extinction of the human race?
3. Would you say that we need to make drastic changes to our lifestyles in order to protect earth?
