Things that have not been done before

I once heard the statement “everything is impossible until it has been done” and I would have **to** agree with it. There are some amazing feats of human achievement **in** recent times that I truly **never** expected to come to be. The mere fact that inventions **such** as the internet or electric powered cars have come to being a reality **and** form part of our everyday lives, just astounds me and if I had been told **about** it in the past, there is no way that I would have believed it. Saying that, I reckon the **way** the world is moving, the pace of technological advances, we are likely to see **even** more achievements of this kind. Whether they will be for the good or bad for mankind, I cannot say, but I imagine that they will at least benefit some people. Let’s hope it is not just financially.
