

MULTIPLE CHOICE CLOZE

Read the text and choose the correct option

Artificial Intelligence

Technological _____ (1) are changing our lives at an astonishing _____ (2). Never before could one have imagined that artificial intelligence would form such a huge part of our lives. It has literally revolutionized many _____ (3) for instance communication, content production, retail and logistics. There are many people who seem to be _____ (4) the idea of its implementation as they fear for their jobs, but really what we are seeing is a _____ (5) in the right direction towards automating the types of jobs that can and should be automated in order to _____ (6) time for executing plans. Basically, we are _____ (7) a point in time in which machines can anticipate trends and what people are most _____ (8) to want or need in the future. These really are exciting yet scary times.

- | | | | |
|----------------|-------------|--------------|-------------|
| 1. a. progress | b. changes | c. movements | d. advances |
| 2. a. time | b. figure | c. rate | d. step |
| 3. a. sectors | b. fields | c. areas | d. zones |
| 4. a. odds | b. against | c. favour | d. for |
| 5. a. step | b. stride | c. stair | d. pace |
| 6. a. get | b. achieve | c. allow | d. let |
| 7. a. enabling | b. getting | c. arriving | d. reaching |
| 8. a. probably | b. probable | c. possible | d. likely |

Artificial Intelligence

Technological **advances** are changing our lives at an astonishing **rate**. Never before could one have imagined that artificial intelligence would form such a huge part of our lives. It has literally revolutionized many **sectors** for instance communication, content production, retail and logistics. There are many people who seem to be **against** the idea of its implementation as they fear for their jobs, but really what we are seeing is a **step** in the right direction towards automating the types of jobs that can and should be automated in order to **allow** time for executing plans. Basically, we are **reaching** a point in time in which machines can anticipate trends and what people are most **likely** to want or need in the future. These really are exciting yet scary times.
